

ArcDPS Addon - DMG Meter

ArcDPS Tip: See total damage of the entire squad.

The screenshot displays the ArcDPS addon interface. At the top left, a damage meter shows 'Damage 664.2k (103.8k/s)' with a white arrow pointing to the 'Total Squad Damage & DPS' header. Below this is a table of player damage:

Rank	Player Name	Damage	DPS	Percentage
	Sigurd Frostheart	164.2k	(21.7k/s)	25%
1:	Sigurd Frostheart	164.2k	(21.7k/s)	25%
2:		159.4k	(18.7k/s)	24%
3:		136.8k	(17.5k/s)	21%
4:		90.4k	(11.0k/s)	14%
5:		52.5k	(6.689/s)	8%
6:		24.2k	(23.3k/s)	4%
7:		22.6k	(2.932/s)	3%
8:		14.0k	(2.094/s)	2%

A settings menu is open, showing options for 'Data', 'Display', 'Style', and 'Position'. A 'Format' window is also open, showing a configuration for the damage meter's output. A white arrow points from the text 'Copy this to see Squad Damage' to the format configuration line: '@2 (@1) Free title bar format'.

Copy this to see Squad Damage → @2 (@1) Free title bar format

The background shows a game scene with a character and various UI elements like 'Celebrate the New Year of the Snake', 'Daily Wizard's Vault Objectives', and 'Casino Blitz'.

Right click your ArcDPS window and under "stats" is a blank field labeled "title bar format." If you type "@1" and/or "@2" there, you can see the combined DPS and total Damage respectively of everyone in the same squad as you. This allows you to quickly quantify the performance of the group as a whole, rather than just the individual players.

Revision #1
